

Provided by Kurt Kiefer:

- 2023 construction planning continues; exploring underground methods including plowing and micro-trenching
- Work continues on private road easements, drop strategy, early sign up process, and service agreement
- Significant effort in resolving make ready/pole attachment issues so planning and implementation can proceed; will be a countywide issue
- Nathan Drager of Quantum Technologies drafted broadband planning scenarios by business type and can be found at the links below. These can be published at the BHCA website, if desired. They might also be sent to members in a separate email.

*Culinary Connectivity: Fiber Optic Transformations for Restaurants:  
Coyote Roadhouse*

- Nsight/Cellcom has created a direct contact for customer inquiries on the Baileys Harbor Broadband Project. All potential customers - residences and businesses - may contact them with any questions they have. This might also be part of a member communication as well as something to be posted on the BHCA website.
